

Provider Communication

Subject: Notification of EDI Enrollment	Priority: High
Date: March 2, 2010	Message ID: ACSBNR03022010_2

Dear Providers,

Currently, if a provider ID number is registered with EDI and linked to a Billing Agency/Clearinghouse to allow submission of claims and eligibility transactions, we do not send notification to the provider or clearinghouse that the provider ID number has been linked. ACS Provider Enrollment would like to improve service and communication by sending out notification to the mailing address listed on the provider file. The letter will let the provider know their provider ID number(s) have been linked to the requested Trading Partner. If you are a Billing Agency or Clearinghouse, please request that your providers notify you when they receive this letter. You may also continue to check status of EDI enrollment documents through the Contact Us function on the GHP Web Portal at www.ghp.georgia.gov or by contacting the CIC at 1-800-987-6715.

ACS will be providing an EDI course to further educate providers about the EDI enrollment process. In addition, be sure to read upcoming editions of the *Provider Focus Newsletter* for our three-part series on completing and submitting EDI enrollment documents. The *Provider Focus Newsletter* and announcements regarding the EDI course will be provided via e-mail blast and in the Banner Messages section of the GHP Web Portal.
